

Recommended servicing checklist

Our sunbeds are prepared for use with a strict scrutiny in mind. In order to keep your sunbeds in good working order we recommend that you perform a general service on your sunbeds every year. We also suggest that an in-depth check needs to be performed every 5-10 years depending on the age and the frequency of the use of the equipment.

Below is a guide on what checks need to be performed in a specific time scale. The checks can be performed by a qualified sunbed engineer.

Part	Basic service guide	Comprehensive service guide
The plug + socket	Every year	Every 5 years
Electrical Wires	Every year	Every 5 years
